A pair of Massoud Jada chairs with metal frames and mixed materials for a soft, plush and stylish effect were another favorite find for this market. As beautiful as they are comfortable, these add interest and style to any conversational area.

The shearlings we saw last year have been reinvented in warm colors to pair with the new saturated hues and cognac palettes that are trending now.

MOMENI KIDS' RUGS

The Momeni Kids Rugs showroom was having a Market Moment, with many of the interior designers wishing they had a youth design project. On top of being adorable, Momeni incorporates safe and non-toxic materials and dyes for added peace of mind and wellbeing.

Any designer's dream, these rugs also utilize a vibrant color palette perfect to pull paint colors from for accent pieces, bedding, furniture and upholstery.

In addition, some of the designs have raised areas for a tactile, close-up, sensory experience for kids of any age and a wonderful visual experience as well.

The new hot lighting trend is cordless lamps! Visual Comfort had an impressive selection of these lamps that charge as well as a selection that use chargeable lightbulbs. This is perfect for areas where you don't have a near by outlet (solving that great challenge of floor outlets or no floor outlets!)
